As a cancer survivor, I intentionally moved to Tompkins County almost 2 years ago, in search of a healthy + beautiful + peaceful environment. It is where I hope to have a healthy retirement in this area.

There is nothing about hydro fracking that comforts me! -- the risk of toxins polluting the water, the soil, the air -- the roads, the landscape, the views, the peaceful environment; the damage to people, plants, animals + all living things ---

There is no sanity in even pursuing anything so risky! FRACKING MUST BE BANNED - FIND ALTERNATIVE ENERGY MEANS INSTEAD!

I understand that my comments will be submitted to the Department of Environmental Conservation as an official public comment in response to the NYS Department of Environmental Conservation's draft Supplemental General Environmental Impact Statement regulating the use of hydrofracturing in the natural gas drilling process.
