I am an 18 year old student that has lived here all my life. I plan to pursue a career in the wine industry and find the risks being ~~to~~ taken disturbing and potentially harmful to my future. Honestly I have been planning to go elsewhere with my business plans. How can you brag about creating jobs when you are chasing future entrepreneurs away to other areas. Dont destroy the Finger Lakes' tourism economy! we are better than California!

I understand that my comments will be submitted to the Department of Environmental Conservation as an official public comment in response to the NYS Department of Environmental Conservation's draft Supplemental General Environmental Impact Statement regulating the use of hydrofracturing in the natural gas drilling process.
