

C.J. Brown Energy, P.C.

Energy Utilization & Commissioning Specialists

PROFESSIONAL ENGINEERS SPECIALIZING IN ENERGY UTILIZATION, CONSERVATION AND MANAGEMENT

Established in 1988, C.J. Brown Energy & Engineering, P.C. (C.J. Brown Energy) is one of the leading energy engineering firms in the northeast. Throughout our over 30 years in business, we have demonstrated the ability to reduce energy use and costs through site-specific energy conservation strategies and systems technologies, to meet the client's investment payback and design objectives and utilizing sound engineering practices.

C.J. Brown Energy provides comprehensive energy engineering services for new construction, major renovations and existing buildings. Our work encompasses all sizes and types of facilities including commercial, industrial, educational, institutional, healthcare, governmental and multifamily buildings. Our clients represent a diverse base of independent facility owners, architects, engineers, state agencies, municipalities, investor-owned utilities and energy services companies.

C.J. Brown Energy has the high level energy engineering expertise to successfully provide services for a wide range of client, project and program needs. Our areas of expertise and services include:

- Sustainability/Green Design/LEED Services
- Building/Energy Modeling, Life Cycle Cost Analysis and ECM Calculations
- Energy Studies, Audits and Feasibility Analysis
- Commissioning and Retrocommissioning
- Industrial Process Energy Evaluation
- ECM Engineering Design
- Performance Contract Implementation Assistance
- Project Management/Coordination

C.J. Brown Energy is an approved Primary Energy Consultant (PEC) for the NYSERDA New Construction Program (NCP). We help building owners and their design teams analyze and implement efficiency opportunities for new or substantially renovated commercial buildings.
