Post-Treatment Water Samples

In order to lift the water use restrictions for Finger Lakes Marine Service, water samples will be collected at 2, 4, 8 & 12 weeks post treatment. Following application, water samples will be collected at 4 locations, two in the proposed treatment area and one Lake site on either end of the treatment area, and these will be analyzed for fluridone. If water samples exceed irrigation restrictions at 90 days, additional samples will be taken. Samples will be kept on ice and shipped via overnight deliver to SePro Lab in North Carolina for analysis. A map of the sample locations is attached with this application. GPS sample locations are below. Samples will be taken at a depth of 1.5 feet below the water surface.
