## **Summary**

This report includes AADT (Annual Average Daily Traffic) and peak hour (5-6 PM) traffic count information for the state, county and local roads in Tompkins County for which traffic count data was obtained for 2019, 2020, and 2021.

## **Data Description**

Traffic count data for 64 state, 94 county, and 143 local road segments (totaling 301) are included in this report. All of these counts were taken by the New York State Department of Transportation (NYSDOT). The traffic counts in this report represent the combined total of all lanes of traffic on each road. Therefore, both directions of travel are combined on two-way roads.

There are four traffic count tables in this report. All four traffic count tables present the same data, each sorting the data differently. In the first table (pages 6 - 12), the data is sorted by in alphabetical order by count location (road name). In the second table (pages 13 - 19), the data is categorized in numerical order by road number. In the third table (pages 20 - 26), the data is sorted in alphabetical order by municipality. In the fourth table (pages 27 and 33), the data is sorted in numerical order by count station number with the local roads first, followed by the county roads, followed by the State roads.

The report includes the following data (column header descriptions are shown in **bold**):

### **Station:**

The number of the Traffic Count Station where the count was measured. The State station numbers are the last 4 digits as shown on the actual traffic count.

### **Road #:**

County roads are listed with the County Route (CR) number as a prefix. State roads are listed with the State Highway (NY) number as a prefix. Local roads are listed with their LHI designated road number.

### **Count Location:**

The name of the road where the traffic count was measured.

### **Muni:**

The city, village or town where the count was measured. The prefix “C/”, “V/” or “T/”, indicates city, village or town, respectively.

**FROM / TO:**

A description of the road segment's beginning and end describing where the count was measured.

**Year:**

The year when the traffic count was measured.

**Source:**

The name of the organization performing the count.

**AADT:**

The annual average daily traffic (AADT) is the number of vehicles that would be assumed counted on a "typical" day of the year. Based on established formulas, a measured traffic count is factored to an AADT by adjusting it for seasonality and vehicle classifications. Adjusting for seasonality is necessary because each season undergoes an increase or decrease in traffic volumes. Counts are adjusted for vehicle classifications since trucks with three or more axles appear as several cars to the counters.

**5-6 PM:**

For the purpose of this report, the PM peak volume was selected to be between the hours of 5:00 PM and 6:00 PM. Actual PM peak volumes may be higher on some roads at a different hour interval.

**Time:**

The month of the year that the count was taken.

**Last Ct:**

The AADT of the most recent count taken on the same road segment.

**Year:**

The year of the most recent count taken on the same road segment as the.

**%Chg:**

The % increase or decrease in AADT when comparing the current count to the most recent count taken on the same road segment.

**1st Ct:**

The AADT of the earliest count taken on the same road segment.

**Year:**

The year of the earliest count taken on the same road segment.

**%Chg:**

The % increase or decrease in AADT when comparing the current count to the earliest count taken on the same road segment.

***Map Description***

The maps on pages 34 through 45 show the locations where the traffic counts were taken. Map 1 shows the locations of road counts in the Towns of Lansing. Map 2 shows the locations of road counts in the Town of Groton the Village of Groton. Map 3 shows the locations of road counts in the Town of Dryden and the Villages of Dryden and Freeville. Map 4 shows the locations of road counts in the Town of Caroline. Map 5 shows the locations of road counts in the Towns of Newfield and Danby. Map 6 shows the location of road counts in the Towns of Enfield and Ulysses and the Village of Trumansburg. Map 7 shows the location of road counts in the Village of Lansing. Map 8 shows the location of road counts in the Village of Cayuga Heights and the NE Portion of the Town of Ithaca. Map 9 shows the location of road counts in the SE Portion of the Town of Ithaca. Map 10 shows the location of road counts in the NW Portion of the Town of Ithaca. Map 11 shows the location of road counts in the Northern Portion of the City of Ithaca. Map 12 shows the location of road counts in the Sothern Portion of the City of Ithaca.
